

LABORATORIES

Biosafety manuals identify the necessary procedures related to access methods, appropriate clothing, good behavioral practices, and ensuring the safe and proper use of all equipment in educational and research laboratories. These procedures apply to all students and personnel accessing the laboratories in any capacity.

- Laboratories SOP
- Macroscopic anatomy room regulation
- Multipurpose room 1 and 2 regulation
- Management of animal carcasses and viscera regulation
- Management of animal carcasses and viscera regulation
- Management of the van used for viscera transportation
- Regulation of access and conduct in the necropsy room

VTH

Biosafety manuals provide an informative tool on procedures related to all activities conducted at VTH with a focus on ensuring quality and biosafety, reduction of personnel exposed to dangerous activities and improve economic management of the VTH. These procedures apply to all students and personnel accessing the VTH.

- VTH SOP
- Diagnostic imaging SOP
- Animal carcasses disposal SOP
- Large animal isolation SOP

OTHERS

Biosafety manuals outline the protocols for collection, storage and disposal of potentially infectious, chemical and toxic waste. These procedures apply to authorized personnel associated with Departmental activities.

- Management of lab chemical waste
- Management of biohazardous medical waste
